Intended use

The Supplemental Nursing System (SNS) is designed to administer supplemental nutrition to babies while they are being fed.

Important safety information

⚠️ For your child's safety and health - WARNING!

- Always keep this product under adult supervision.
- Always check food temperature before feeding.
- Inspect before each use. Throw away if the first signs of damage or weakness.
- Keep components not in use out of the reach of children to avoid risk of suffocation and strangulation.
- Never attach to ribbons, bows or loose parts of clothing. The child can be strangled.
- Use Medela original accessories.
- Do not modify any parts of the SNS.
- This is a single-use product. Use by more than one user without adequate cleaning may present a health risk and should be avoided.
- Denno produkt er øvsett for å anvende. Den anvends av flere personer uten at rengjøring skjer før hver bruk. Det kan være et helsefare med å bruke produktet av flere personer.
- Never use a device, components or parts if dirty, mould or other contamination is visible.
- Take off the SNS parts that come in contact with the breast and breast milk immediately after use to avoid drying out of milk residues and clogging of the tube or bacteria growth.
- Store the clean parts in a clean place. It is important that all residual moisture dries.
- Do not store parts in an airtight container/bag.
- Wash your hands thoroughly with soap and water before use.
- Do not warm breastmilk or infant formula in a microwave oven as this may cause uneven heating and could scald the baby.

Note

Plastic component parts become brittle when frozen and may become damaged if mishandled, e.g. dropped, knocked over, or over-tightened. Take appropriate care in handling components.

How to use

- Be advised that a breastfeeding specialist or healthcare professional can provide advice if you are unsure how to use the SNS.
- Wash your hands thoroughly with soap and water before use.

Handling

- Take off the cap that堵住了管子的入口，然后将管子插入乳房和乳头中。
- On the outside of the tube, there is a small hole for the valve. Turn it clockwise to open the valve.
- Turn the handle on the tube to open the valve.
- Push the tube into the breast until the valve is fully open.
- Release the clamp to let the milk flow.

Positioning the SNS and feeding

- Once the SNS is completely assembled and the clamp is engaged so that milk cannot flow, invert the SNS and clip it securely and comfortably to a bra strap or top.
- Place a clean sponge around the breast to support the tube (see picture 3). Once the baby has a good latch (created vacuum), gently insert the tube about 1.5-2 cm into the top corner of the baby's mouth to ensure its stable placement (see picture 4).
- Release the clamp to let the milk flow.

To change the flow of milk

- The height of the system can be raised to increase flow and lowered to slow the flow.

Info

- If either mother or baby are finding it difficult to use the device with feeding, release the baby from the breast and try again. At first it may be necessary to try these times. Please note, the baby should never be forced to feed if pressure is felt with the SNS. If the baby is becoming upset try again at the next feed. For some babies it may take a couple of attempts before this becomes an easy way to feed together.
- Fixation tube may also be used to help position the tube if necessary. Once the SNS has been assembled and clipped to a bra strap or shirt, tape the end of the tube to the breast with it protruding past the nipple by about 0.5 cm at either 10 o'clock or 2 o'clock position. After the baby has latched onto the tube, you would normally hold the tube with your hand.

Accessories

Visit your local Medela website for a list of available SNS accessories.

Cleaning/Sanitizing Instructions

WARNING!

- Only use drinking-quality water for cleaning.
- Before first use and after each use**
- Disassemble the SNS into its individual parts. Make sure to carefully remove the valve from the twisted lid.
- Rinse all parts (including cleaning with cold water (approx. 20 °C)).
- Following this, clean all parts with plenty of warm, soapy water (approx. 30 °C). Use a commercially available washing-up liquid, preferably without any harsh chemicals, artificial fragrances and colouring.
- To prevent the tube from getting dirty, wash the tube with cold water and flush the tube 3 times.
- Rinse all parts again with cold water (approx. 20 °C).
- Using the rinsed cleaning dish cloth, flush the tube 3 times with clean water and then again with air until the inside of the tube is visually dry.
- Dry with a clean cloth or leave to dry on a clean cloth.

Before first use and after every day

- Clean the product with either boiling water, in the dishwasher or with Quick Clean bags. To clean with boiling water, cover the components (excluding tube, clamp, ring, and cleaning cloth) with water and boil for 5 minutes.
- Clean in the dishwasher, place the components (excluding tube, clamp, ring, and cleaning cloth) on the top rack or in the cutlery section. Use a commercially available dishwashing detergent.
- Wipe the tube with a clean cloth or leave to dry on a clean cloth.

Disposal

According to local regulations.

Storage

Store the clean parts in a clean place.

Material

150 ml Container, Lid, Twistlok Lid, Cleaning Aid, Clamp - PP

Ring, Valve - Silicone

Twistlok Tube - Silicone, ABS
